

Configuration structure of *Edward II*

The configuration structure below displays horizontally the number of the speech, the speaker, and the graphic symbols which denote the state of the dramatis personae:
■ = speaking; ▨ = present; ▩ = absent; □ = aside; The death of a figure is indicated by | .
The figures have each a vertical column which tells of the degree of participation. As the play develops the configurations become visible, likewise configurations changes and their lengths. (see Manfred Pfister. *The Theory and Analysis of Drama*, Cambridge: University Press, 1988, pp.164)
