

## Configuration structure of *Richard III*

The configuration structure below displays horizontally the number of the speech, the speaker, and the graphic symbols which denote the state of the *dramatis personae*:

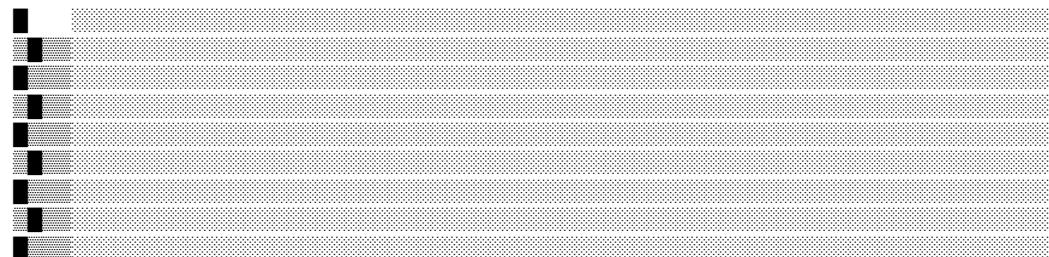

█ = speaking; █ = present; █ = absent; □ = aside; The death of a figure is indicated by | .

The figures have each a vertical column which tells of the degree of participation.

As the play develops the configurations become visible, likewise configurations changes and their lengths. (see Manfred Pfister. *The Theory and Analysis of Drama*, Cambridge: University Press, 1988, pp.164)
